

## [ A1 AMPLIFIER FRONT AND BACK ]

At first blush, the A1 amplifier looks a bit underfed. Even scrawny. A long drink of water and rail thin, the idea of it packing a punch simply doesn't play by virtue of its physical appearance alone. Yeah, well look out. The A1 is a full-frequency (20Hz-20kHz), 250 monaural, Glass G animal that efficiently kicks major butt across a wide dynamic range with not low, but way-low distortion. And because we're talking about a "power on demand" constitution, it does so without sweating like a pig.

## [ SPECIFICATIONS ]

Description:	Full range (20hz - 20kHz), class G, monaural amplifier for Evolution M5, M6, T5, U1, U2 and other general audio use.
Controls/Features:	Power, 12V/Audio trigger, 115v/230v switchable, soft clipping, rack mount kit (optional), adjustable lamp intensity
Power Rating:	200W into 8ohm, 250W into 6ohm, 300W into 4ohm RMS.
THD:	<0.01% 20Hz-1kHz, <0.075% 1kHz-20kHz at full power
S/N Ratio:	>100dB
Input Connectors:	XLR, RCA
Dimensions:	2.125" H x 17" W x 11" D
Weight:	18 lbs
