

[CLASSIC FOUR]

Eye-friggen'-carumba. The Classic Four is the Three only with a big (and dare we say in the politest possible way), massively round bottom. This bottom, thanks to the addition a 10" side-firing subwoofer, inserts some serious rumbly in the tumbly (not to mention being pretty sweet in the looks department). Perfect for medium to large sized rooms, the Four offers ridiculously robust dynamics and can stuff every inch of a big space with insanely believable, life-sized sound.

[SPECIFICATIONS]
